

FILE NAMING

What the file name will look like before CREA orchestration:
X20G001P023RBVLNI-2.WAV

Calculating Tempo:

Orchestration/Speed/Group/Part/Finished

1. Divide the number of the tuplet by the amount of beats it takes up. i.e. a tuplet of 5 sixteenth notes in the space of 4 sixteenth notes would be: $5/4 = 1.25$
2. Multiply this number by the current tempo. $1.25 \times 120 = 150$

(Number of notes in tuplet/amount of beats tuplet occupies) x tempo
